

DROPPIX RECORDER XE

The most appropriate solution for burning, duplication and printing needs

Droppix Recorder XE is the ideal solution for archiving all your electronic documents and for volume production and distribution of marketing materials, electronic catalogs, or multimedia CDs.

Combined with multiple recorders, duplication towers or Direct-to-Disc printers, Droppix Recorder XE provides users with unparalleled experience. The solution adapts easily to all professional users expectations and needs

Mastering

Create and manage the content of your discs (data, audio, video)

Multi-burning

Duplicate your masters on several recorders or towers simultaneously

Label all your discs

Design, edit and personalize the labels of your discs

Multi-printing

Print labels on several peripherals at the same time (LightScribe-enabled drives or Direct-to-Disc printers)

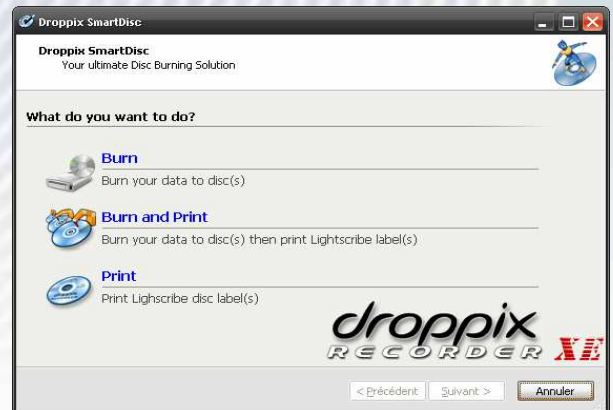

Droppix Recorder XE covers all aspects of manufacturing your own CDs and DVDs in business, from designing the master right through to mass production and the printing of personalised labels on the backs of the disks.

Droppix Recorder XE is compatible with most recorders and towers which can be connected (USB2, FireWire, SATA, etc.) and with all LightScribe-enabled drives and Direct-To-Disc colour printers (Rimage, Primera, Canon, Teac, Epson, etc.).

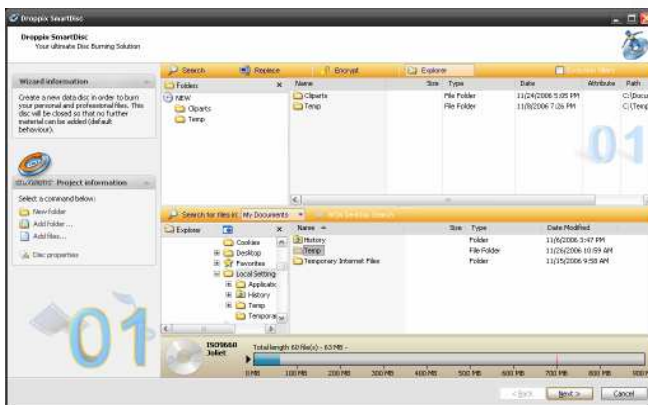

All-in-one and user-friendly

Droppix Recorder XE has mastering, recording and printing capabilities that are available through one single software interface. Droppix Recorder XE comes with **Droppix SmartDisc**, an easy-to-use project selector to prepare and submit discs for recording and/or printing.

With Droppix SmartDisc, simply select the task according to your need: "**Burn**", "**Burn and Print**" or "**Print**". Timesaving and truly easy-to-use, this assistant assists you in each step and helps you to succeed in creating, duplicating or printing all your discs.

Mastering capabilities

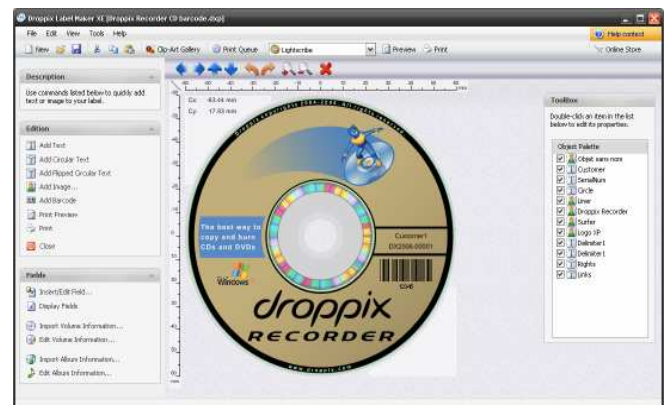

Create and manage the content of your master. Add files, folders from your PC or from remote servers available through your company network, categorize them, use automatic exclusion filters to use or exclude some of the data and encrypt your data or your disc. These are just a few examples of what you can do with Droppix Recorder XE.

The solution comes with an integrated **ISO disc image editor** enabling you to create, visualize, convert and even edit disc images. Droppix Recorder XE supports all most popular image formats.

Easy label creation and personalization

Create professional-looking labels including text, images, pictures, logos, etc. The **WYSIWYG** (work in real size) graphical editor comes with numerous templates, fonts and backgrounds. Layers management and transparencies features let you control every single detail.

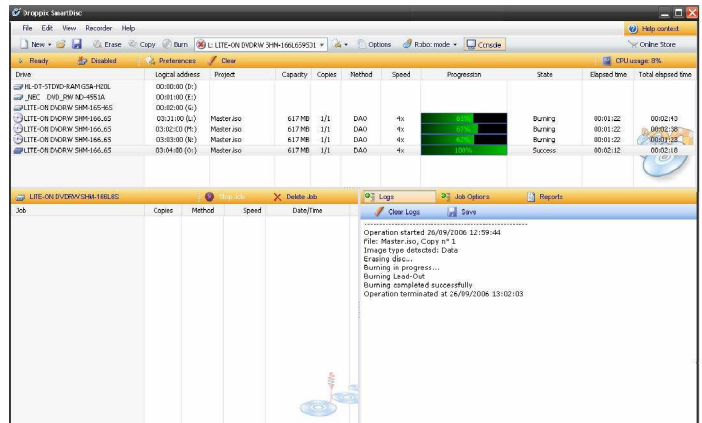

Personalize your labels using **bar-codes**, **serial numbers** or simply merge data (customer name, company, etc) from your **databases**. Droppix Recorder XE is able to merge data from your **CSV**, **SQL**, **Oracle**, **Act!** or **Outlook** databases.

Multi-burning and multi-printing

Droppix Recorder XE is capable of recording **several jobs at the same time** or printing one or several labels onto **multiple printers or LightScribe-enabled drives** simultaneously.

The integrated **multitasking management console** provides a clear outlook of the activity of all your connected optical peripherals. You have total control over all files in the queue, you can manage all recording and printing jobs and access **detailed error log files**, among other information.

Benefits of using PC connected LightScribe towers

A LightScribe tower is a duplication tower that is connected to a PC through a cable (USB, Firewire, SATA, etc). The LightScribe-enabled recorders enable you to burn your data and personalize the labels of your discs with the LightScribe technology from Hewlett-Packard.

Droppix Recorder XE is the only software that can print LightScribe labels in series to multiple LightScribe-enabled drives at the same time. This absolutely unique feature combined to mastering and multi-burning capabilities will enable you to perform successfully all your professional discs, from end to end.

Key benefits :

- ✓ **Easy use and management of all the recorders**, in burning, duplication or LightScribe printing mode.
- ✓ **Burn and/or print several projects in parallel** using the available recorders.
- ✓ **Label all your discs in series, or on demand**, through the LightScribe technology that is fully integrated into Droppix Recorder XE.
- ✓ **Real time master creation** with either your local files or with files that can be accessed remotely **through the network of your company**, then **select the recorders to use**.
- ✓ Quick and easy creation of personalized discs in low/medium volumes through the Droppix Recorder XE **"Burn and Print" mode**. Advanced publishing features like **serial numbers, bar codes** and **customized fields** enable you to personalize all your labels.

Whether you are interested in making your own PC connected LightScribe towers at competitive cost and/or expand your product line:
